DETAILED ACTION

The Preliminary Amendment

Receipt is acknowledged of the preliminary amendment filed on September 8, 2003.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 15-19, drawn to a double monochromator, classified in class 356, subclass 333.
- II. Claims 20-22, drawn to a reflection light transfer module, classified in class 359, subclass 850+.

The inventions of Groups I and II are distinct, each from the other. The double monochromator of Group I does not require the particulars of the reflection light transfer module of Group II for patentability, as evidenced by the claims of Group I. The reflection transfer module of Group II does not require a double monochromator for patentability, as evidenced by the claims of Group II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because the search required for Group I is not required for Group II and vice versa, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR § 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the

Art Unit: 2877

inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17(i).
